Cultural diversity is the quality of diverse or different cultures, as opposed to monoculture, as in the global monoculture, or a homogenization of cultures, akin to cultural decay. The phrase cultural diversity can also refer to having different cultures respect each other's differences. The culturally destructive action of globalization is often said to have a negative effect on the world's cultural diversity.

By analogy with biodiversity, <u>which</u> is thought to be essential to the long-term survival of life on earth, it can be argued that cultural diversity may be vital for the long-term survival of humanity; and that the conservation of indigenous cultures may be as important to humankind as the conservation of species and ecosystems is to life in general. The General Conference of UNESCO took this position in 2001.

This position is rejected by some people, on several grounds. Firstly, like most evolutionary accounts of human nature, the importance of cultural diversity for survival may be a non-testable hypothesis, which can neither be proved nor disproved. Secondly, it can be argued that it is unethical deliberately to conserve "less developed" societies, because this will deny people within those societies the benefits of technological and medical advances enjoyed by **those** in the "developed" world.

A-Comprehension:

Read the text carefully then do the activities.

The televised advertisement where a genuine father exposing the undeserving result <u>his</u> son got in exam to the school distinctly stipulates what roles parents should hold in the fight against today's cheating that would more likely to be tomorrow's corruption.

Inspite of its look of a bit exaggeration and funny ,the short advertisement carries a huge message to everyone of us without the restriction of stakeholders in guarding our children (students) to detest cheating in exam.

All of us have to feel the pain of having a citizen <u>that</u> kills its people instead of giving life if he or she is not sooner than later prevented from any of the possibilities of exam cheating; Yes, if parents, teachers and other concerted effort fail to tackle the ever increasing and dynamically progressing evil act of cheating during exam, we can imagine what kind of generation the nation is producing.

As times pass by with technologies growing parallel, the techniques applied to exam cheating at all levels of educational institutions:universities, high schools and primary schools are very dynamic and different for examiners and supervisors to arrest. As the technology advances, we can imagine how the techniques of cheating get ahead too.

A number of new and more sophisticated cheating mechanisms are being introduced; and the influx of mobile phone also played its own role of being one of the channels for exchanging exam answers between and among cheaters.

Cheating in exams has added <u>its</u> own headache to the education sector while the sector is already suffering to tackle challenges related to ensuring quality and the like.
