

**THE FIRST TEST**

Read the text carefully then do the activities.

Get real! That’s the loud and clear message the International Anti-Counterfeiting Coalition wants to send to consumers. The problem of product counterfeiting has grown over 10 % in the last two decades. While there are many reasons for its growth, including more advanced technology and the internet, among others, increased consumer demand has certainly been a factor in fuelling the explosion.

The truth about counterfeiting is black or white. Definitely it is illegal; however, perfect imitations, cheap prices, availability on common markets and covering one’s needs are poor excuses for supporting illegal activity. For those conscious consumers who disagree, it might be very tricky because, counterfeits are made to such perfection that it is difficult to distinguish between the fakes and the genuine. It’s as wrong to support thieves, as it is to steal. As consumers we ought to use our buying power to encourage legitimate, socially responsible companies which design and develop products through creativity, research and manufacturing excellence!

We are calling all consumers to become educated about the consequences of purchasing forged products. We want consumers to know that counterfeiters are hardened criminals, exploiting children in sweatshops. Profits generally support gangs, organized crime, terrorism and child labour.

Purchasing counterfeit products is not a harmless, victimless action. In fact, counterfeiting has negative consequences on health, public safety and worldwide economy.
